## How to Make Suncatchers Using Crayons

1. First you'll need to make some **crayon shavings**. WITH AN ADULT, peel back the paper and grate using a pencil sharpener or cheese grater.

2. Gather all your shavings up into one place.

3. Place one piece of the cut **wax paper** onto an old piece of newspaper or rag and sprinkle some shavings on top of it. Then place a second piece of wax paper on top (like a sandwich)!

4. If you'd like to have a **string** in your finished sun catcher for hanging, you can place one end of the string in between the two sheets of wax paper before you iron it.

5. WITH AN ADULT: Turn on your **iron** and set it on a low setting (one without steam). Once it's warmed you're ready to melt the crayon shavings.

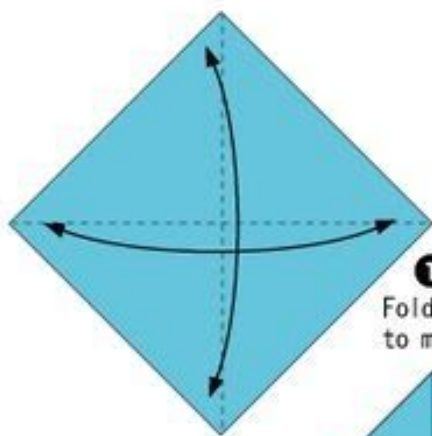

6. Then place another sheet of newspaper or scrap paper on top of your wax paper and crayon shaving 'sandwich'. Now slowly iron the paper. Keep checking every few seconds to see if your crayon shavings have completely melted. Once they have, set your project aside to cool and dry.

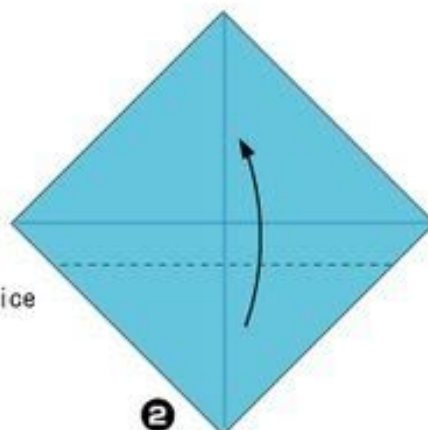

7. Once it's dry, you can trim it into any shape you'd like. We cut ours into different sized hearts!

# DOUBLE KNOT BRACELET

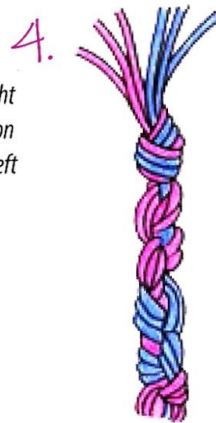

Choose two colors, and cut three equal strands of each. Knot the strands together and secure to work surface. Separate the colors into two bunches (A and B).

Hold the B strings on the right straight and taut. Then place the A strings on the left over the B strings on the right, and make a forward knot.

Hold the A strings on the left straight and taut. Then place the B strings on the right over the A strings on the left to make a backward knot.

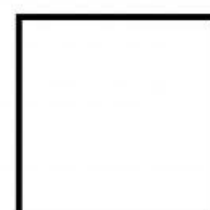

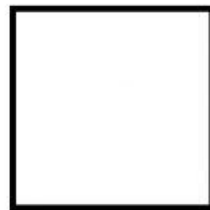

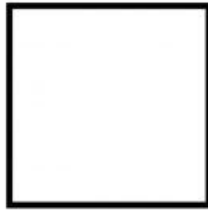

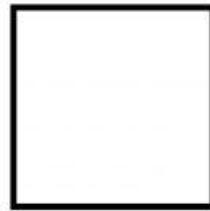

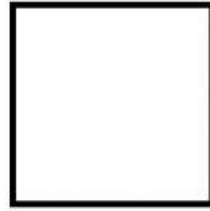

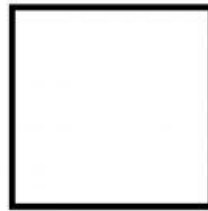

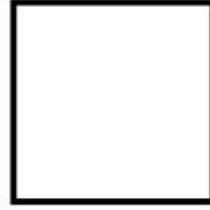

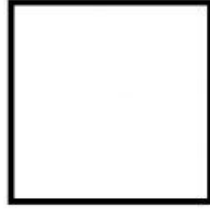

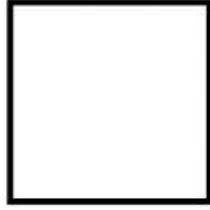

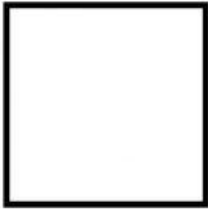

Repeat process until bracelet is desired length.
